

Poker Hand Rankings

POKERPRO.TOOLS

Texas Hold'em, strongest to weakest · exact frequencies counted over all 2,598,960 five-card hands

#	Hand	Example	Odds against	% of hands
1	Royal Flush	As Ks Qs Js Ts	649,739 : 1	0.000154%
2	Straight Flush	9h 8h 7h 6h 5h	72,192 : 1	0.00139%
3	Four of a Kind	Ks Kh Kd Kc 2s	4,164 : 1	0.024%
4	Full House	Js Jh Jd 8c 8s	693 : 1	0.144%
5	Flush	Ad Jd 8d 5d 3d	508 : 1	0.197%
6	Straight	Ts 9d 8h 7c 6s	254 : 1	0.392%
7	Three of a Kind	Qs Qh Qd 7c 4s	46 : 1	2.11%
8	Two Pair	As Ah 9d 9c 5s	20 : 1	4.75%
9	One Pair	Ts Th Kd 7c 3s	1.37 : 1	42.26%
10	High Card	As Jd 8h 5c 2s	1.00 : 1	50.12%

Suits: s spades · h hearts · d diamonds · c clubs

When two players make the same hand

Straight Flush	Highest top card. A-K-Q-J-10 (Royal) > K-Q-J-10-9 > ...
Four of a Kind	Higher quad rank, then kicker
Full House	Higher trip rank, then higher pair rank
Flush	Highest card, then 2nd, 3rd, 4th, 5th
Straight	Highest top card. Ace can be high (A-K-Q-J-T) or low (5-4-3-2-A)
Three of a Kind	Higher trip rank, then 2 kickers in order
Two Pair	Higher of the 2 pairs, then lower pair, then kicker
One Pair	Pair rank, then 3 kickers in order
High Card	All 5 cards compared in order, highest first

A flush beats a straight, and three of a kind beats two pair.

Rarer hands win. The percentages above are the whole of the ranking: every hand beats the one below it because it is harder to make.
